

PHOTOVOLTAIC MARKET IN POLAND

XI EDITION
MAY 2023
WARSAW

LIST OF CONTENTS

Commentary from the IEO President	9
Commentary by Partners of the Report	12
1. Summary.....	14
2. Strategic regulatory environment and the role of photovoltaics in achievement of RES energy objectives for 2030	18
2.1. Photovoltaic market – tendencies so far	25
2.2. Photovoltaic Market in the European Union	30
3. Individual and business prosumer market.....	33
3.1. Micro-installations in the period of transition from the net-metering system to the net-billing system	33
3.2. Impact of financial support programs on the prosumer market	40
3.3. Impact of the Net-billing system and “Mój Prąd” subsidies on profitability of investments by individual and business prosumers.....	46
3.4. Impact of the net-billing system and “Mój Prąd” subsidies on the market and the profitability of energy storage.....	49
4. Market of photovoltaic farms in Poland	58
4.1. Development of photovoltaic farms.....	58
4.2. Impact of the auction system on development of PV farms	64
4.3. Restrictions in access to the power grid	68
5. Mid-term forecast for the development of PV investment market.....	80
6. Survey results for companies in the supply chain on the domestic photovoltaic market – tendencies, prices, plans	85
6.1. PV installations – cost structure and price tendencies	86
6.2. Photovoltaic modules, inverters and storage units on the Polish market	88
6.3. Development of photovoltaic projects	94
6.4. Risks and perspectives of further development of the PV market	95
6.5. Productivity forecasts for photovoltaic farms in Poland	97
7. Development perspectives for the PV industry	101
Companies participating in the PV market research	105
Products and analyses by IEO	108
